TS-6040 X Ray Baggage Scanner Work Principle
x ray baggage scanner in uae 2021 Airport Baggage Scanners

X – ray security inspection equipment has the baggage handling, X ray source and control part, signal acquisition and processing and the transmission part and the image processing part and electric control part. X – ray security inspection equipment will send checked baggage into the crawler channel to complete the

transfer with the help of the conveyor belt. Goods into the channel, detection device and relevant information will be sent to the control unit, the X – ray source emitting X rays by the control unit triggers.

X ray through the collimator form very narrow fan beam,through the conveyor belt into the luggage on the detector, the X – ray detector transfers received X ray into the electrical signal.The weak current signal is amplified to quantify

Transmitted through the universal serial bus to the industrial control computer for further processing, and after operation imaging processing complex to obtain high quality images.
